Shubham Wankar

Data Science Specialist

shubhamwankar23@gmail.com | Pune, IN | www.linkedin.com/in/shubham-wankar/ | +91 8978996233

SUMMARY

Senior Data Scientist with **8+ years of experience** building **production-grade AI systems** and analytics driven platforms. Proven track record designing and deploying **LLM-based APIs, RAG pipelines, and decision systems** that replace brittle rule engines, improve system reliability, and meet strict latency and accuracy requirements. Strong background in **Python-based microservices, AI systems, model evaluation, and cross-functional collaboration** with Product, Legal, and Operations teams.

KEY SKILLS

Programming Languages: Python, SQL, JavaScript
Data Analytics: Exploratory Data Analysis (EDA), Regression Modelling, Statistical Analysis, Hypothesis Testing, Predictive Modelling
Cloud & Systems: Azure App Services, Azure OpenAI, Monitoring
AI & ML: Machine Learning, NLP, Feature Engineering, Model Evaluation, LLM Systems
Tools: Pandas, Numpy, scikit-learn, Streamlit, FastAPI, Azure, Codex, Claude Code, Github Copilot
Collaboration: Product Requirement Translation, Cross-functional Stakeholder Management, Documentation, Mentorship

PROFESSIONAL EXPERIENCE

Data Science Specialist | Group Legal — Apr '26 - Present
UBS — Pune, IN

- Built a custom invoice extraction tool using **Azure OpenAI** that reduces manual effort by 75%
- Spearheaded the development of data quality detection and remediation tool that **reduces the data quality issues by 20%**

Senior AI/ML Engineer — Sep '24 - Apr '26
Accenture — Bengaluru, IN

- **Developed PII anonymization microservice** using FastAPI, Microsoft Presidio and spaCy improving retrieval precision and compliance readiness by 45% for RAG pipeline
- Built a robust scalable async **FastAPI micro service** using Microsoft Agent Framework to summarize KPIs and feedbacks using AI for top-level executives improving latency from 4 minutes to 1 minute
- Created a **LLM-as-a-evaluator framework** for evaluating user input completeness for **enhancing the feedback generation quality by 30%**

Data Scientist — Jun '23 - May '24
Invictus Performance Lab — Bengaluru, IN

- **Built a predictive Random Forrest model** with 85 % accuracy to predict user readiness score based on qualitative and quantitative data providing real-time insight to coaches
- **Developed computer vision models for biomechanical analysis**, integrating outputs into downstream analytics systems for analyzing range of motion
- **Delivered real-time dashboards** with active KPIs used by professional sports teams for actionable insights
- Steamlined analytics and reporting pipelines, **reducing manual effort by 75%**

Senior Risk Analyst — Feb '17 - Oct '22
Amazon — Hyderabad, IN

- Performed **root cause analysis across 400+ investigations**, generating insights that informed policy and workflow redesign
- Partnered with global policy, legal, and operations teams to optimize SOPs, **reducing handle time by 5%**
- Acted as a **subject matter expert**, translating operational signals into structured, data-driven recommendations
- **Mentored 15+ team members**, maintaining high quality and productivity standards

EDUCATION

Masters, Data Science — Oct '21 - Jun '23
Liverpool John Moores University, UK — Distance Learning

Post Graduate Diploma in Data Science — Jun '20 - Jul '21
IIIT Bangalore — Distance Learning

Bachelor of Technology (BTech) — Aug '12 - Jul '16
J.B. Institute of Engineering and Technology — Hyderabad, IN

CERTIFICATIONS

- HackerRank SQL Intermediate Certification
- Generative AI Engineering with Databricks
- IBM: Agentic AI with LangChain and LangGraph
- Google: LLM Ops
- Agile Project Planning
